Sample **1g D8 Cart - Strawnana Shortcake**

Sample ID	SD220618-016 (48985)	Matrix	Concentrate (Inhalable Cannabis Good)	Batch ID	AD8CSS-001
Tested for	Anchored MFG				
Sampled	-	Received	Jun 17, 2022	Reported	Jun 20, 2022
Analyses executed	CAN20				

Laboratory note : The estimated concentration of the unknown peak in the sample is 14.1% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. The estimated total d8-THC concentration is 96.0%

This report is for informational purposes only and should not be used to diagnose, treat or prevent any disease. Results are only for samples and batches indicated. Results are reported on an "as received" basis, unless indicated otherwise. When a Pass/Fail status is reported, that status is intended to be in accordance with federal, state and local laws which are required for the customer to be in compliance. The measurement of uncertainty is not included in the Pass/Fail evaluation unless explicitly required by federal, state or local laws and has been reported on the certificate of analysis. Measurement of uncertainty is available upon request.

Delta 8 Vape Cartridge | Potency COA

The previous section of this Certificate of Analysis (COA) displays **potency test results** of the product, specifying the concentrations of the various cannabinoids present.

Knowing a product's potency before consuming it is important, of course, but it is also important to verify that your product is not adulterated with unwanted or dangerous ingredients. A simple potency test cannot determine whether adulterants are present in the product; however, a full panel test is much more thorough and tests the product for adulterants like heavy metals, pesticides, and residual solvents.

The following section displays **full panel test results** for the base distillate used in this product. The only ingredients in these cartridges are:

- 1.) Delta 8 distillate, and
- 2.) a proprietary blend of ISO-, GMP-, and FSSC-certified terpenes,

so you can feel safe knowing that this product complies with industry safety standards.
